Applicant's arguments filed 10-01-02 have been fully considered but they are not persuasive.

Rejection of the claims under 35 USC 102 over JP-A-7,271,263 is withdrawn in light of applicants' arguments.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by JP-A-7,179,556.

Rejection is maintained for the reasons set forth in the previous Office action. Applicants' arguments have been considered, but rejection is maintained because the Abstract of this document clearly recites the articles defined to be used in shoe sole applications and packing materials which typically are foamed and/or foamable.

A translation of this patents full disclosure will be sought. However, the following rejection is being set forth assuming arguendo that foaming is not en explicit or inherent feature of JP-A-7,179,556's full disclosure.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP-A-7,179,556.

Rejection is set forth for the reasons set forth under 35 USC 102 above. JP-A-7,179,556 differs in that foaming of the articles is not explicitly required. However, the reference recites shoe sole and packing applications in its uses. It is well known to the polyurethane art to use blowing agent for the purpose of imparting cushioning properties. Accordingly, it would have been obvious for one having ordinary skill in the art to have utilized blowing agents in the preparation of the articles of JP-A-7,179,556 for the purpose of imparting cushioning properties in order to arrive at the products and processes of applicants' claims with the expectation of success in the absence of a showing of new or unexpected result.
